

SPECIFICATION & DATA SHEET

AUTOMATIC CHANGEOVER MANIFOLD

The MIPS range of manifolds is designed for economy, reliability durability whilst requiring minimum maintenance. The range of manifolds offers many design features as standard.

- Fully complies with BCGA Codes of Practice
- Robust wall-mounted framework (floor-mounted option available)
- Pre-set regulators & pressure sensor(s)
- Highly visible gauges for cylinder contents and pipeline pressure
- High-pressure cylinder connection hoses to BSEN ISO 14113
- Cylinder support chains and racks included
- Includes safety relief valve and isolation valve
- All manifolds are tested and certified before despatch
- Each manifold is covered by a full warranty

The following are some standard options available;

- Free-standing floor-mounted
- Corner mounting
- Special layouts
- External weatherproof cages

In addition to all of the above, MIPS can **custom build** manifolds to your specific requirements.
