

## SPECIFICATION & DATA SHEET

### MEDICAL VACUUM PLANT

The MIPS Medical Vacuum Plant provides a centralised source of vacuum. The systems are designed for economy, reliability and durability, whilst offering the following features as standard:

- Fully complies with HTM 02-01
- Compact and aesthetically designed
- All interconnecting pipework and wiring is included
- Flexible connections on pump pipework
- Anti-vibration mounts on pump units
- Fail-safe control system in event of power loss
- Each machine is fitted with adjacent electrical isolator
- Control panel fitted with highly visible indicators
- Integral alarm system interface indicator
- Control includes full 'operating and indicating' system
- Alarm and BSM outputs for remote status indication
- All pressure switches and sensors are factory set for ease of installation
- All plant are tested and certified before despatch
- Each plant is covered by a full warranty

In addition to all of this, MIPS can **custom build** vacuum plants to your specific requirements. Here are some examples available;

- Acoustic hooded machines
- Special layouts
- Other supply voltages
