

## SPECIFICATION & DATA SHEET

### OXYGEN PRESSURE REGULATOR WITH FLOWMETER

The MIPS Oxygen Pressure Regulator with Flowmeter is designed to facilitate the adjustment of the flow rate of gas to be administered to a patient through the respiratory tract.

- CE marked
- Bullnose fitting for large cylinders
- Pin index version available
- Standard flow rate: 40l/min
- Maximum flow rate: 150 l/min
- Single Stage Pressure Regulator with Flowmeter 0-15 l/min
- Pre-set pressure relief valve, calibrated at 10 bar
- Vertical/horizontal positioning available
- 6cm long adaptor between flowmeter and regulator
- Tubing nipple
- Every unit rigorously tested prior to despatch
- Batch number stamped on regulator for identification purposes
- Complies fully with the requirements of TM 02-01

In addition to all of the above, MIPS can offer the following options:

- Cylinder spanners
- Humidifiers & adaptors
- Oxygen tube and mask

The right is reserved to change the specification of the items described herein at any time.
