

SPECIFICATION & DATA SHEET

REGULATED OUTLET

The MIPS range of outlets are designed for all industrial gases and can be manufactured in different formats i.e. rear entry, side entry etc. The standard range of outlets offers the following features:

- All outlets are designed and manufactured to BCGA Codes of Practice
- Suitable for pressures up to 24 bar
- Optional flashback arrestors on oxygen and fuel gases
- Bench or wall-mounted options are available
- Non-return valve fitted
- Shut-off valve fitted
- All outlets are tested and certified prior to despatch
- Each outlet is covered by a full warranty

The right is reserved to change the specification of the items described herein at any time.
